SUMMARY

Final-year Computer Science student with a solid understanding of core programming concepts and a drive to learn and innovate. Actively developing skills through hands-on projects using modern technologies like React. Eager to leverage my academic background and passion for technology in a software engineering role.

EXPERIENCE

Intern

EliGo   **May 2025 - July 2025, Bangalore, India**

· Developed a fully responsive personal portfolio website from scratch using React.js to showcase technical skills and projects.

Intern

NIELIT   **June 2024 - June 2024, Chennai, India**

· Completed a comprehensive training program in Machine Learning, covering fundamental algorithms and data analysis techniques.
· Developed a predictive model to detect the likelihood of lung cancer from patient data using the k-Nearest Neighbors (k-NN) classifier.

PROJECT

Portfolio

acs558-portfolio.vercel.app/ · August 2025 - August 2025

· I developed a complete, responsive personal portfolio website from the ground up using React.js.
· I built reusable UI components, set up client-side routing to create a smooth user experience, and used modern state management techniques.
· This project allowed me to apply my web development skills to create a professional platform to showcase my projects, skills, and certifications.

EDUCATION

Bachelor of Technology in Computer Science

Bapatla Engineering College · Bapatla, India · 2026 · 9.1

Intermediate

Narayana Junior College · Chirala, India · 2022

CERTIFICATIONS

Generative AI

Google Cloud · 2024

SKILLS

Hard Skills: React, JavaScript, Java, Html, CSS, Tailwind, Figma
Soft Skills: Verbal Communication, Team Collaboration, Problem-solving
